

Task 4: Write a Java Program to Find the Maximum Element in an Array of n Integers

PROGRAM:

```
import java.util.scanner;

public class Task4
{
    public static void main (String[] args)
    {
        Scanner sc =new scanner(system.in);

        System.out.print("Enter array size: ");
        int n =sc.nextInt();

        int[] arr = new int[n];

        System.out.println("Enter array elements: ");
        for(int i=0;i<n;i++){
            arr[i] = sc.nextInt();
        }

        int max =arr[0];

        for(int i=1;i<n;i++)
        {
            if(arr[i] > max) {
                max=arr[i];
            }
        }
    }
}
```

```
}  
}  
System.out.println("Maximum element = " + max);  
}  
}
```

OUTPUT:

```
C:\Users\vin24\OneDrive\Desktop\java programs>java Task4  
Enter array size: 6  
Enter array elements:  
1 4 10 45 78 62  
Maximum Element = 78
```
